

ProScan Education
Fellowship Program

THE YEAR LONG FELLOWSHIP EXPERIENCE

Raising the Bar of Patient Care

TAKE YOUR ABILITIES TO THE NEXT LEVEL

ProScan Imaging manages one of the largest advanced imaging radiology practices in the world, interpreting nearly 1000 MR and advanced imaging examinations per day. Our Cincinnati facility alone interprets at least 250 MRI scans daily with a varied case mix including MSK, neuro, CNS, cardiovascular, abdominal, breast, and much more.

Founded over two decades ago, ProScan Imaging Education Foundation is recognized as one of the world's leading training centers for healthcare specialists in MRI and other advanced imaging modalities.

FELLOWSHIP OBJECTIVES:

- Improve patient care
- Read with more speed and intensity, more productivity for your practice
- Increase credibility with ProScan Master's certificate of completion

THE PROGRAM

The Year Long Fellowship takes a multi-faceted approach to educating physicians in the field of radiology. We believe the road to mastery begins with exposure to as many cases as possible. The following pages discuss the methods in which the fellowship program provides unparalleled case access and sets the stage for invaluable teaching from our team of experts.

THE JOURNEY TO MASTERY

SELF: ProScan has developed over 200 hours of videos, five textbooks and thousands of teaching cases dedicated to the topic of MRI. Self study time refers to time in which you can review the library of teaching tools available to you at the headquarters. Our education team will help guide you through this resource and present the right material to you at the right time.

ASSIGNED CASES: Case volume is critical to learning how to increase your speed and accuracy in MRI. We will assign as many cases as you can read each day and will steadily increase the volume as you improve your skill-level. We will ensure you see a wide selection of cases covering all subspecialties of MSK. In the course of a Mastery Level fellowship, you will see more than 1,000 cases..

SIDE BY SIDE: Side by side learning is time spent with a ProScan master reader actively reviewing your practice dictations or reviewing new cases for teaching purposes.

READING OBSERVATION: Reading observation is your opportunity to watch our expert readers practicing their craft. While this primarily observational learning, the attendings will be able to answer some of your questions during this time.

SAMPLE FELLOWSHIP DAY

8 - 9:00 AM: Self Guided Learning (Video & Case Review)

9 – 11:00 AM: Assigned Cases/Dictation

11-11:45 AM: Side-by-Side Case Review

12 – 1:00 PM: Bi-weekly Noon Lecture

1 – 2:00 PM: Reading Observation

2 – 4:00 PM: Assigned Cases/Dictation

4 – 4:45 PM: Side-by-Side Case Review

4:45 – 5:30PM: Self Guided Learning

BENEFITS OF THE PROSCAN MASTER CLASS

Here are some of the key features from ProScan's master class program:

- All participants are assigned a customized learning plan [that suits their needs](#). Aspects of the customized plan may include pre-fellowship access to online lectures, hand picked case lists based on focus areas, support texts to use before and after fellowship.
- Access to ProScan's case library containing thousands of teaching cases.
- Mastery certificates which highlight the number of cases read in key areas.
- Side by side readouts with some of the world's highest level readers.
- One year of unlimited subscription to all of ProScan's educational material post completion.

GRADUATES OF THE MASTER CLASS WILL HAVE:

Attended over

350

expert readouts

Learned more than

1,500

diagnoses

Read more than

3000

MRI's

THANK YOU FOR CONSIDERING PROSCAN ON YOUR JOURNEY TO ENHANCE YOUR MEDICAL EXPERTISE
